

# Required Annual BBP Update

## Quiz

1. True      False      Standard Precautions is a system of infectious disease control that assumes that every contact with bodily fluids is infectious.
2. True      False      An exposure could result from direct contact to an open skin lesion, mucous membranes, or a puncture wound.
3. True      False      You should only wear gloves if you think that person has a disease.
4. True      False      Frequent hand washing reduces the risk of spreading disease.
5. True      False      Hepatitis B virus can survive in dried blood on surfaces for a week.
6. True      False      An occupational exposure is defined as blood or body fluid contact from an injured or ill employee/student to the affected employee
7. True      False      When an occupational exposure occurs, you don't have to do anything special.
8. True      False      You can receive the Hepatitis B Vaccine through the district at the Warren County Health Dept.

## Employee Statement of Acknowledgement

I have read and agree to abide by the Standard Precautions Procedures as outlined in this presentation. I understand that if I have any questions or concerns, I may contact the school nurse at 897-4350.
